OUR SERVICES

01

Data engineering

Scalable pipelines, ETL and ELT, Spark, dbt, Snowflake, BigQuery.

02

Business intelligence

Dashboards in Power BI, Looker and Tableau. Faster decisions.

03

Process automation

Automate manual workflows: robotic automation, Python, integration APIs.

04

Cloud infrastructure

AWS, GCP and Azure design. Secure, scalable, cost-optimised.

05

Project management

Scrum master and technical project management, from kickoff to launch.

06

Data strategy

Architecture, governance and compliance planning. Start right.

07

Predictive analytics

Machine learning models: churn, segmentation, demand forecasting.

08

File processing

Automate spreadsheet and export handling. Mobile-ready report chains.

09

Web design

Fast, secure sites built from scratch. No page builders.

HOW WE WORK

STEP 1

Discovery call

A 15-minute call to understand the problem. No sales script.

STEP 2

Scoped plan

A fixed scope, a fixed fee and a date. No open-ended hours.

STEP 3

Senior delivery

The person who scoped it is the person who builds it.

WHY FLUENTDATA

- **Senior people only**
No junior team learning on your budget, and no handovers.
- **Registered in the EU**
Invoicing without friction across Europe and the Americas.
- **Multilingual by default**
English, Spanish, French, Italian and Polish. One point of contact.
- **Outcomes, not hours**
We agree on what changes in your business, then we build it.
